

EASY-FILL™ VALVE

ELIMINATES MULTIPLE FITTINGS FOR FILL APPLICATIONS

STREAMLINED COUPLER / HOSE BARB CONNECTIONS

The stubby valve configuration combines a female coupler and hose barb for a connection to a male adapter on a sprayer. The valve eliminates multiple fitting connections reducing cost and leak points. Easy-Fill is a no hassle fill solution.

FULL FLOW VALVE

Available in 2" full port and 3" full port stubby designs to maximize flow and reduce fill time.

SMART, USER FRIENDLY DESIGN

An *optional carry handle* promotes easier handling with hose attached. The quick connect coupler is extended to prevent handle interference. 3" version incorporates three cam arms to ensure security with the heavy duty coupling.
