

Banjo 2" Pump-Only Family with 2 Impellers

This kit includes both a 3-vane and 5-vane impeller.

The 3-vane impeller (12771A) is to be used on a 3 HP motor – while the 5-vane impeller (12772) is for a 5 HP motor.

Please beware, the 5-vane impeller should only be used on the 5 HP (or larger) engine to prevent overloading the motor thereby causing premature engine failure.

Please beware, the 3-vane impeller should only be used on a 3 HP engine. If it is used on a 5 HP engine – the flow would be compromised.
